iv) Illustration of impact of expense ratio on scheme's returns :-

"Suppose an investor invests Rs. 10000 in an equity oriented fund with a prevailing NAV of Rs. 12 then he will be allotted 833.33 units (10000/12). Say in one year the fund's underlying portfolio generates an return of 12% and scheme's Total Expenses Ratio is 2.5%. In this case, his NAV will increase to Rs. 13.14 i.e.9.5% (12% -2.5%) and not by 12%. The value of his units after one year would be Rs. 10950 (833.33 X 13.14)."

Note(s):

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year.
- The expenses of the Direct Plan under the Scheme will be lower to the extent of the above mentioned distribution expenses/commission
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.
- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor

This addendum shall form an integral part of the SID / KIM of the above mentioned Plan as amended from time to time.
